Natural Stone

Quarried natural stone by nature have conditions that cannot be controlled, i.e. Color, size, veining, fissures, &
thickness, etc. As a consumer it is important you understand some of the conditions are inherent in natural
stone. Granite, marble, limestone, travertine & any quarried products offered have been cut from carefully selected done
stone. Granite, marble, imestone, travertine & any quarried products offered have been cut from carefully selected atone
stone. Granite, marble, imestone, travertine & any quarried products offered have been cut from carefully selected atone
cocurring imperfections which are characteristic to the stone. These characteristics will include color and shade variations, geological
flaws, irregular markings, voids, veins, fissures, cracks, lines and/or minor separations. It is a standard
practice by the manufacturar to repair these separations by one or more of the following methods waxing,
filling, or reinforcements with non-stone products. All of these variations and characteristics are common and
present to some degree. However, part of the beauty of having natural stone is the characteristics, which will
not impair the function or wearing of the materials.

Link to usage and maintenance guide.

Date of Acceptance

Class Tile

Some common problems that occur with class lifes are "ohosting," cracking, and moisture build un. Ghosting is when you see a streaky, which have behind your glass. To help avoid this, we use appropriate thin set material. Due to this issue it is successed that homeowners use a more opaque class lite to hide the defect. Cracking is also a significant problem that can occur during or after installation. This is an inherent trait or disass tile and cannot be avoided all together. Inspection of class site before installation by owner is sucquested. Please take the time to further research the product if wanted. Handmade class the has imperfections and varies from piece to piece. Merto Surfaces does not assume responsibility for variations in color, size or my other imperfections. Sheet mounted lie will be straightened to the best of our ability but we cannot quarantee it will be perfect because it is an imperfect product.

Design, layout, tile joint size etc.

It is the owner/contractor/designer responsibility to provide Metro Surfaces with detailed specifications of desired tile installation in writing and in the form of detailed drawings referring to tile layout, accents in tile, specific grout size, placement of benches or recess niches, location and size of other items that come into play at tile finish.

Fixed, pickerment of benches or recess niches, location and size of other items that come into jusy at the hinan.

Providing or Tile & Rough Masterials

Procosals include labor & rough material cost unless otherwise noted. Most frequently proposals also include tile & trim unless noted for others to support, in the instances Merrior Surfaces does not supply tile lesease be aware of the following...

If others provide the material we will charge a handling fee that varies dependent upon our involvement of handling, ranning for \$.50-1.00/sdt. We are unable to see materials in Advance of installing or pull space on the materials, therefore prohibiting our knowledge of what we are installing until we see it. This also makes if impossible to gauge tile thicknesses to determine tim sizes or colors, determine which thinsets standard or the second of the second or t

Extra materials

Metro Tile assumes 7-15% waste depending on tile size. A small amount of each type of material will be left onsite for attic stock. Any other additional material left over will be returned and a credit will be issued for material unless it is a special order/mon stock. It material is a non-stock/special order it will be donated to Habitat for Funnanty or recycled.

Grout, Joint Size and Shading of Cement Grouts [Selaction of a grout color that contrasts with the tile will emphasize the grout joint and correspondingly any

Owner, contractor or designer also referred to as "others"

Selection of a grout color that contrasts with the tile will emphasize the grout joint and correspondingly any variations in itse ize and position.

Please see tile manufacturers specifications for grout joint size allowances. All manufactured tile has variations in size and calible from tile to tile, it is not a perfect product. A grout joint is needed to accommodate tile variations and required installations. But joint (1/16 or smaller) does not provide sufficient accommodation for dynamic building movement, differential thermal expansion, or allowable variation in fabrication or manufacturing per TCNA inconsistent grout is a condition where colored grout dries to its expected color in some areas, a darker color in some areas and varying between. This is caused by lob site conditions and the inconsistent nature of Porland Cement. It is

Selection of a similar or complementary grout color will de-emphasize such variations.

considered a manufacture defect.

Flattening/levelling
The process of flattening or leveling when quoted in a proposal as a specific scope of work is intended to bring a floor into TCNA flatness shandards for that particular installation. Because many varying jobste conditions exist floors in most cases will not be level. Flattening unless discussed and quoted in a proposal of walls or floors is not included. The owner, contractor or other party responsible for installing noirs unsistrates to tile is responsible for providing Metro Surfaces with a surface that is in tolerances for TCNA industry standards of installation.

Lighting
Use of wall-washer and cove-type lighting, where lights are located at the wall/caling interface, or mounted directly on the wall, are popular techniques for producing dramatic room lighting effects. These lighting techniques will produce shadows and undestable effects in this surfaces. In addition when surfaul fighting from windows or on exterior tile applications in at a text angle, parallel to tile surfaces normal and acceptable inconsistencies in finish tile work are highlight by shadows and isseggerate conditions.

Scheduling

Metro Surfaces will discuss availability at time of proposal and possible duration of project. Once proposal is Metro Surfaces will discuss availability at time of proposal and possible duration of project. Once proposal is signed Metro Surfaces will insert project into current schedule. A specific data and time cannot be determined weeks in advance. As project becomes ready for file/stone installation a more specific schedule can be agreed upon. Mero Surfaces commits to mobilizing on project within 48 hours of the agreed upon time. If project is not ready for installation at time of mobilization a new schedule based upon adjusted availability will be established. Once a project has begun, if job is halted or postponed by owner/contractor a remobilization fee of \$425 may be billed.

Payment
Payment and deposits are due upon receipt of invoice. No terms are available. Metro Surfaces does not accept credit card payments.
1/5% interest will accrue after 30 days of non-payment.
Venno payments will be assessed and additional 2% charge on top of invoice amount.
Final touch up or list invort will not be completed until progress payment is received. Metro Surfaces
prides itself in customer satisfaction. Prompt and full payment is what we expect in return. Disputes in payment
or work provided if resulting in attorney less will be paid by the customer if responsibility is deemed so.

Scope of Work

Work done is based on proposal above & design documents provided by owner/designer/contractor. Any items not listed in proposal
or any changes in design after point of estimate/proposal will result in a change of cost.

Work that is done by Metro Surfaces in addition to this proposal will be billed at the rate of \$75 an hour during normal business hours
or \$85 an hour if work is done outside of normal business hours, puts materials & marbus of 15%.

Hours for drive time, additional estimating due to adds to the original scope of work, site coordination meetings, work area prep &
installation & project management will be charged at previously listed rates.

These rates & rules also apply to work agreed to be done at time & material rates.

In the case that field conditions require work to be done by others that Metro Surfaces can't provide & Metro Surfaces
is requested/required to sub out work to other contractors, these services will be marked up 20% for management.

Change order requests, ASI reviews, PRs etc. that result in a change of work scope and require estimating, management, ordering etc. will be billed at \$150 per hour for PM time spent.

Warranty Guaranty & Patch Work

Metro Surface's provides a one year warranty from date of completion of area of installation. Any patch & repair work done to caulul/grout
ionis or tile after one year from completion will be changed at the rate of \$75 per hour plus material cost & 15% OHP. The \$75 an hour
will be applied to drive time & labor time to complete the repairs. All patch work required as a result of damage or as per
contributional for requient to follow some rates.

Slab/Solid Surface Installations

Proposals encompassing subhyoid surface fabrication offsite & onsite installations include material & labor. All holes drilled, subsurface included & sealing. Proposals do not include electrical, plumbing, carpentry or bear out. Slab/Material listed out above is selected & approved by clients. Payment of deposit of 50% down signifies approval of proposal for this scope of work.

Providing of Tile 8 Rough Materials

Proposals include labor 8 rough material cost unless otherwise noted. Most frequently proposals also include tile 8 trim unless noted for others to support, in the instances Metro Surfaces does not supply like lease be aware of the following...

If others provide the material we will charge a handling fee that varies dependent upon our involvement of handling, ranging for \$ 50-1,00/sqt.

We are unable to see materials in advance of installing or pull space on the materials, therefore prohibiting our knowledge of what were installing until we see it. This also makes it impossible to gauge tile thicknesses to determine trim sizes or colors, determine which thinsets are most appropriate, if the tile were required by manufacturer to be set in a recommended pattern & etc. We can recommend footages to purchase but have no way to verify footages that are ordered are correct. We cannot be responsible for material shortness, broken materials during shipping, or managing lead times on this. We do not store materials for more than a week if a purchased by others.

We require 24 hour advance notice & approval for any shipments we may receive for projects where others provide materials.

We require 24 hour advance notice & approval for any shipments we may receive for projects where others provide materials.

\$ 40.00 this is on top of hourly rate included in proposal rate.
\$ 25.00 this is on top of hourly rate included in proposal rate.

Exterior Applications

Exterior install of tile will not have a warranty by Metro. Loose tiles, cracked grout and caulking will be repaired as maintenance, needed at Taku. Metro does not recommend exterior bonded applications due to the extreme heat and freeze-thave swings byte in Utah. We do suggest unbonded-set and pedestal systems along with mechanically fastened applications on vertical installat
